

Patchara Yakiaw

Junior Web Developer

CAREER OBJECTIVE

Motivated web developer passionate about user-friendly, responsive design. I enjoy solving problems and learning new tools to build better web experiences. While my focus is on front-end development, I'm eager to grow into full-stack responsibilities and contribute to a creative, collaborative team.

PROJECTS

Movie Finder

- Built a movie search and watchlist app using React, Vite, and TMDB API
- Implemented trending, genre filtering, and trailer navigation features
- Designed a responsive UI with TailwindCSS

Pizza Restaurant

- Developed a responsive restaurant UI using Next.js, TypeScript, and TailwindCSS
- Implemented dynamic and catch-all routing for category and product navigation
- Managed global cart state using Redux Toolkit

Admin Dashboard with Store

- Built a full-stack store and admin panel with Next.js, Prisma, and MongoDB
- Developed and consumed RESTful APIs for product, category, and order management
- Integrated Stripe for payments and Clerk for secure authentication
- Designed modern website using TailwindCSS and Shadcn UI

Ecommerce Web App

- Developed a responsive eCommerce website using React, and TailwindCSS
- Built a responsive eCommerce UI with product browsing, filtering, cart management, and checkout flow.
